NAJEEB ULLAH

MERN Stack Developer | React.js | Node.js | TypeScript | MongoDB | Firebase
Pakistan | +92 349 0302906 | najeeb13750@gmail.com

Professional Summary

MERN Stack Developer with 1+ year of experience building scalable, responsive, and high-performance web applications using React.js, Node.js, Express.js, MongoDB, Firebase, and TypeScript. Experienced in REST API development, authentication, role-based access control (RBAC), responsive UI development, reusable component architecture, and modern frontend development. Passionate about writing clean, maintainable code and delivering business-focused solutions.

Technical Skills

- Programming: JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend: React.js, Next.js, Material UI, Tailwind CSS, Bootstrap, React Router, React Hook Form, React Query
- Backend: Node.js, Express.js, REST APIs, JWT Authentication
- Database: MongoDB, Mongoose, Firebase Firestore
- Tools: Git, GitHub, Postman, Vercel, Netlify, VS Code

Professional Experience

- Web Developer | Xivia Soft | Dec 2024 – Present
    - Developed responsive web applications using React.js, TypeScript, HTML5, CSS3, Bootstrap, and Material UI.
    - Integrated REST APIs and third-party services to improve application functionality.
    - Optimized application performance, improving load times and user experience.
    - Collaborated with designers and backend developers using Git-based workflows.
    - Maintained scalable, reusable, and production-ready code following modern development practices.

Projects

StoreMate POS – Enterprise Multi-Tenant SaaS

- Developed an enterprise-grade multi-tenant POS platform using React.js, JavaScript, Node.js, Express.js, MongoDB, and Tailwind.
- Built inventory, sales, purchases, customer/vendor management, ledger, reporting, and profit & loss modules.
- Implemented JWT authentication, role-based access control (RBAC), secure REST APIs, barcode generation, and automated database backup.
- Designed reusable components, responsive dashboards, and optimized application performance for real-world business operations.

Single Muslim – React.js & Firebase

- Developed a matchmaking platform using React.js, Firebase, Material UI, React Hook Form, and Yup.
- Implemented Firebase Authentication, protected routes, and role-based access control (RBAC).
- Built responsive profile management and matching workflows with reusable React components.
- Integrated Firebase services to provide secure and scalable user management.

Education

Bachelor of Science in Computer Science
University of Swat
